

Ashton Gligich

Brooklyn, NY | (347) 410-3017 | ashton.gligich@gmail.com | www.linkedin.com/in/ashton-gligich

Education:

Purdue University

July 2025 - Current

First Year Engineering - BS Aerospace, Aeronautical and Astronautical/Space Engineering (GPA: 3.74/4.0)

Academic Coursework: Multivariable Calculus, Physics, Engineering (MATLAB, CFD, CAD), Technical Communication/Presentation

Workplace & Leadership Experiences:

Goldstein Capital Corp, Intern

July 2023 - July 2025

Financial Support

- Analyzed and interpreted market trends and asset valuations using the Bloomberg terminal and in-house proprietary formulas.
- Contributed to data-driven decision-making and strategy development for key financial projects and investment strategies.

Technical Support Engineer

- Maintained an internal application responsible for client asset positions, reporting generation, and integration with Bloomberg terminal (C#, ASP.NET MVC, MSSQL)
- Modified internal and client-facing reports using SSRS.
- Maintained MsSQL Server(DB Backups, Index Rebuilding, Query Writing)

Summer Design Institute for Staten Island Tech, Teaching Assistant

June 2024 - August 2024

- Assisted students with learning 3D Computer Modeling; provided support for the design of civic projects in the region.
- Project Manager for multiple engineering-based models, inclusive of aerospace and automobile technologies.

Private Tutor

September 2021 - July 2025

- Provided tutoring in reading, writing, science, and vocabulary development to ESL students.
- Utilized visuals, technology, and collaborative strategies to overcome language barriers and increase reading comprehension scores and grade point averages.

Aerospace & Engineering Projects:

Purdue Solar Racing, Aero Lead Engineer

August 2025 - Current

Hands-on engineering contributor

- Contribute to early-stage structural design for a student-built solar vehicle supporting the 2026 competition.
- Assist with carbon fiber monocoque chassis layout by integrating suspension hard points, electronics, and safety constraints into CAD models
- Perform stiffness-to-weight trade and finite element analysis to evaluate structural performance

VIP - Purdue Aerial Robotics Team, Engineer

August 2025 - Current

Hands-on engineering contributor

- Contribute to the analysis, design, and integration of a student-built competition aircraft
- Assist with avionics layout, wiring harness routing, and component selection withing CAD environment
- Perform structural, thermal, and electrical analysis of avionics components using Siemens tools

STEM Design & Innovation Projects

- **Leg Piano Calculator:** Designed and built an interactive calculator controlled by piano-style foot pedals to make math practice more engaging.
- **Math Gloves:** Developed gloves with integrated finger-display lights to visually represent math operations, helping learners follow step-by-step calculations.
- **Visual Addition/Subtraction Board:** Built a light-up display that demonstrates addition and subtraction operations in real time for younger students.

Skills:

Programming: Python, Javascript, vue.js, HTML, CSS, DIY Soldering, C#, [ASP.NET](#), Microsoft SQL

Modeling: Siemens NX, SolidWorks, Ansys Workbench, Onshape, Blender, Autodesk CFD, Inventor, AutoCAD, Fusion 360

Technical: Microsoft Office Suite, Google Workplace Suite, Microsoft SQL

Language: Fluent in English and Russian, Native Speaker

Certificate: American Red Cross Certificate Of Completion, CPR/AED Certified
